# ARTSVISION™

**You didn't go into the performing arts to spend time on frustrating, repetitive administrative tasks.** Our ingenious, virtuoso software manages all aspects of your artistic planning, venue management, production and operations – creating reports and schedules with a single click.

## KEY FEATURES

ArtsVision can easily handle all of the planning, scheduling, production, operations and budgeting needs of a multi-venue performing arts center.

- Central Calendar – A single, definitive calendar that can be personalized to suit each user's requirements, with drill down capability into each event, provides the key scheduling and navigation tool for ArtsVision

- Event Information – Rich and detailed event information from personnel and resources to special event notes and documentation, is all collated in one location

- Production Information – Rich and detailed event information from casting, artist scheduling and resources to special event notes and documentation, is all collated in one location

- Production Budgeting – Full resource tracking and costing allows detailed budgets to be produced

- Personnel Management – Powerful tools for assigning personnel to events allows the creation and communication of detailed personnel schedules

- Artists Management – Automate the creation and tracking of artists contracts, schedules and expenses.

- Sync and Export – sync with Outlook and other calendar applications. Export files and information to websites and other accounting and ticketing applications.

- Security – Control the access and creation of all information though multi-layered security and permission controls.

**BENEFITS**

ArtsVision provides immediate benefits in the following areas:

- Efficiency & accuracy – The elimination of duplicate calendars and information reduces administrative effort, errors, and miscommunication and provides a single definitive source of information

- No IT infrastructure – ArtsVision hosts and supports the application and all your data, meaning no IT cost to you

- Transparency – Management can view and analyze all aspects of the business from one source

- Planning – Plan and budget more efficiently with season scenarios, event templates and resource tracking

- Centralized database – A full historic record of past events for reference, analysis and re-creation

**WHO USES ARTSVISION?**

Every person involved in running a performing arts venue can use ArtsVision to work more effectively in their respective roles:

- Executive Management – see all aspects of the business from a single database

- Planning Department – quickly map out season scenarios and then fill in the event details as the status moves closer to confirmed

- Artist Relations – create and track artist schedules, contracts and expenses

- Rental Management – quickly determine availability, book and hold spaces, produce contracts and settlements

- Production Department – assign and track staff and resources, produce budgets

- Operations Department – assign and manage staff, produce detailed schedules

- Technical Department – create staff schedules, store technical documents, track resources
